WHY SELECT?

MANY YEARS OF EXPERIENCE

SELECT was founded back in 1947, and ever since, we have strived every day to create new and improved products so athletes worldwide can pursue their sport with the absolute best conditions.

WORLDWIDE RECOGNITION

Our products are sold in more than 50 countries worldwide, indicating that our products are globally recognized.

WIDE RANGE OF SPORTS EQUIPMENT

At SELECT, you'll find EVERYTHING FOR YOUR CLUB. We have a wide selection of balls, sportswear, sports care, training equipment, and sports accessories, catering to all ages and levels.

HIGH QUALITY PRODUCTS

Our constant focus on product development ensures that our products can withstand the demands that come with intense sporting activity. For us high quality means good durability, good playability, and comfortable products.

PROFESSIONAL SUPPORT

We are the official match ball sponsor in several major football, futsal, and handball leagues worldwide and thus our balls, and other products, are used by the best professionals everyday all year round.

SOCIAL VALUES

We take our social responsibility seriously. We donate a large number of balls to charitable projects every year. Additionally, we have our SAHEP program, ensuring proper conditions for our stitchers working for the factory in Pakistan and their families.

SUSTAINABLE VISION

We actively work to reduce our environmental impact and manufacture products with care for the planet. We produce balls from recycled plastic bottles, clothing from recycled materials, and cones from recycled plastic.

INNOVATIVE APPROACH

We always strive to develop the best products for athletes. Therefore, innovation is a major focus for us, constantly looking at how we can improve our products or even invent new ones.

UNIQUE CUSTOMER SUPPORT

We offer unique customer support, which makes us a preferred partner by numerous international distributors, federations of all types and sizes, clubs and shops on all levels – reliability and trustworthiness are words that are often used to describe SELECT.

WHY SELECT FOOTBALLS ARE PLAYER'S CHOICE™

HIGHEST QUALITY

At SELECT, we create footballs of the highest quality. For us high quality means: best durability, best playability, best touch, and most predictable and straight flight – we never compromise on this!

BEST MATERIALS

For making the best balls, you need the best materials. We constantly search the market for the best available materials – and we use them. Without compromises.

FOOTBALL FOR ALL PURPOSES AND LEVELS

With us, you'll find footballs for top professional level, club level, street football, skill training, indoor football, artificial grass, youth football, and leisure football. We probably offer the widest and most advanced ball range that is available in the market.

RECOGNIZED BY MAJOR FOOTBALL LEAGUES

We are the official match ball sponsor in several major football leagues and thus our footballs are used and tested by professional players day in a day out.

PRODUCTION EXPERTISE

We use all modern and up-to-date production methods available, and we are always in front when it comes to optimizing and developing balls and materials.

UNIQUE CO-OPERATION

As the only international ball brand, we work with only one supplier and our supplier only makes balls for us. This exclusive co-operation has existed since 1977 and ensures that our common know-how and R&D can only be used for our brand.

INNOVATIVE INVENTIONS

In 1962, our founder, Eigil Nielsen, developed a football with 32 panels – a revolutionary design in the football world. The 32-panel ball has an optimal roundness, ensuring a straight and predictable flight. Football players have appreciated the invention of the 32-panel football ever since and innovating the football is still a major focus and a core value for us.

ENVIRONMENTALLY FRIENDLY FOOTBALL

Our PLANET football is partially made from recycled plastic bottles. It also uses natural latex. This means that approximately 60% of the ball consists of natural and recycled materials. We constantly look for ways to optimize the environmental impact in the production.

WE ARE EXPERTS

In all modesty, we consider ourselves as ball experts. We have several people working only with ball production and development, just to ensure that even the smallest detail of a ball is as perfect as possible.

TESTS FOR PERFECTION

All our balls are well tested before they enter the market – first, the balls are tested thoroughly by players and clubs in the development phase. After production, the balls are tested thoroughly in quality control before they are released for sales. We spend a lot of resources with testing in order not to compromise on what we deliver.

INSPIRED BY 60 YEARS OF BUNDESLIGA!

These are the **DERBYSTAR by SELECT** official Bundesliga match balls for the 2023/24 season

On the occasion of the 60th anniversary of the Bundesliga, the sports goods manufacturer from Germany was inspired by the look of classic footballs from the beginning of the Bundesliga when creating the design and reinterpreted it for the new official match ball. While in the past the 12 pentagons were monotonously black, DERBYSTAR has upgraded them with dynamic design elements and eye-catching colors to create an innovative look for the new official match ball.

First Official Bundesliga match ball partly produced of recycled material

An innovation is hidden in the material of the new ball: For the first time, recycled material is used in the production of an official match ball of the Bundesliga. In total, around 10% of the new Official Bundesliga Match Ball is made from recycled polyester by weight.

FORTUNA:LIGA

SELECT is the official ball supplier for the best Czech league, Fortuna Liga. It is the first time in history that Fortuna Liga has an official league ball.

From the 2023/24 season, the historic collaboration has been extended to also include the second best league in the Czech Republic and both leagues play with the unique Brillant Super TB.

GJENSIDIGE KVINDELIGA & 3F SUPERLIGA

SELECT is the official ball supplier to the best Danish leagues for both men and women, including men's 1st and 2nd division.

3F Superligaen, NordicBet Ligaen and Gjensidige Kvindeliga are playing with the new Brillant Super UZ – the worlds first football made with ultrasonic technology.

All matches in the men's 2nd division are played with the Brillant Super TB. A new and exclusive ball design is introduced every season.

Cooperations with the leagues ensures the best balls on the market for all stadiums.

BRILLANT SUPER UZ 3F SUPERLIGA V24

Style no. 101177 Size 5

Not available

A new, superb football made using a new construction method with ultrasonic sound waves bonding the 32 panels together.

The ball is composed of carefully selected quality materials with the characteristics of a classic SELECT ball.

The new 3D diamond structure of the surface material ensures an even more stable trajectory, optimized friction between ball and boot and the best grip for goalkeepers.

The new construction ensures minimal water uptake compared to a hand-stitched ball, helping the ball retains its original weight when playing on wet surfaces.

Beneath the outer material, the ball has a newly developed lining consisting of two different foam materials and a Zero Wing latex bladder with a built-in balance point, located opposite the valve hole.

The outer material and the underlying foam ensure a light and soft touch.

ALLSVENSKAN & SUPERETTAN

SELECT is the official ball supplier to the Swedish leagues Allsvenskan and Superettan. Over the years, the partnership has evolved, and now several football clubs in Allsvenskan also play in SELECT wear. Allsvenskan plays all matches with our top ball, Brillant Super TB.

Allsvenskan is the highest league in Sweden, founded in 1924, meaning that Allsvenskan celebrates its 100th anniversary this year. There are 16 teams in the league, and the season runs from spring to fall. Superettan is the second-highest league, played since 2000, and the top two teams from Superettan moves up in Allsvenskan.

Every year, the champions of Allsvenskan lift the Lennart Johansson trophy, named after the late Lennart Johansson, who was, among other roles, the president of UEFA from 1990-2007.

WHY SELECT FUTSAL BALLS ARE PLAYER'S CHOICE™

HIGHEST QUALITY

At SELECT, we craft futsal balls of the highest quality. Durability and functionality are always a focus when we engage in the production of our futsal balls.

BEST MATERIALS

For making the best balls, you need the best materials. We constantly search the market for the best available materials – and we use them. Without compromises.

PERFECT FOR FUTSAL

Our futsal balls are designed to meet the demands of fast-paced play. They have a surface that ensures optimal ball contact and control. The soft core makes the ball less lively and easier to control, perfect for the nature of futsal.

WIDE SELECTION

You'll find futsal balls in our range catering to top professional levels, club play, as well as for children and youth.

PRODUCTION EXPERTISE

We use all modern and up-to-date production methods available, and we are always in front when it comes to optimizing and developing balls and materials.

RECOGNIZED BY PROFESSIONALS

Our FUTSAL SUPER TB series is the preferred choice of professional leagues, teams, and players worldwide due to its innovative features and high-quality materials.

ENVIRONMENTALLY FRIENDLY FUTSAL BALL

Our PLANET futsal ball is partially made from recycled plastic bottles. Additionally, natural latex is used in this ball, reducing the environmental impact of the ball.

WE ARE EXPERTS

In all modesty, we consider ourselves as ball experts. We have several people working only with ball production and development, just to ensure that even the smallest detail of a ball is as perfect as possible.

TESTS FOR PERFECTION

All our balls are well tested before they enter the market – first, the balls are tested thoroughly by players and clubs in the development phase. After production, the balls are tested thoroughly in quality control before they are released for sales. We spend a lot of resources with testing in order not to compromise on what we deliver.

GOALCHA FIVE-A-SIDE

Style no. 240011 Size 2

Price PLN 210

Five-a-side handball is a new and modern form of senior handball, developed in 2018 by DHF and DGI in Denmark.

The aim was to create a sports activity with a wide appeal, where anyone can participate regardless of level and skills.

The ball is a further development of the popular Goalcha Street handball.

Designed for Five-a-side handball.

The ball is also suitable for beach handball and other outdoor activities.

Good for warm-up exercises and technical training for youth and senior teams.

The ball is filled with polyfibre instead of a normal bladder, which makes it extremely soft.

The softness gives the ball a fantastic grip, which allows for a quick game where everyone can participate regardless of level and skill.

No resin is used for this type of ball and it does not need to be inflated.

The ball is machine-stitched.

EHF approved.

Size 2. (Ø54).

CLOTHING

NEW MONACO COLLECTION

Welcome to our brand-new Monaco 2024 collection – our most exclusive player and training wear.

This high-quality collection of player and training wear pays homage to the modern sports universe, where style meets functionality.

In our pursuit of incorporating more sustainable initiatives, we have, as a novelty, ensured that all products in our Monaco 2024 collection contain recycled polyester. Some products are made entirely from recycled polyester, while others are partially composed of it.

This collection encompasses everything from our tailored player and training gear to specially designed outfits for coaches and team leaders, as well as leisurewear – and

each garment is a manifestation of our dedication to quality and performance. We've also included a stylish rain kit that combines practicality with an elegant aesthetic.

Regardless of the weather conditions, our clothing can handle it. Our player jerseys and shorts are not only quick-drying and breathable but also lightweight and made from durable materials. This makes them suitable for both football and handball, ensuring that players can perform at their best without compromising on comfort. But it doesn't stop there. We've elevated the design in this collection to new heights. A fresh pattern has been integrated into our player kits, and the color palette has received a creative lift compared to our previous collection. Now, there are even more options, allowing each team to express their unique style on the field.

A soccer referee in a bright yellow shirt with 'FIFA REFEREE' on the chest is talking to players on a soccer field. One player is wearing a red jersey with 'VIRGI' on the back, and another is wearing a black jersey with 'FC BAYERN MÜNCHEN' and the number '6' and 'KIMMICH' on the back. A camera operator is visible on the left side of the frame.

REFEREE UNIFORMS

SELECT referee clothes focus on movement and comfort with practical details such as two chest pockets, a separate pocket for writing utensils and an inner trouser pocket for keys.

The referee uniforms have been developed and tested by referees, and are made in a quick-drying, breathable and durable material.

GOALKEEPER GLOVES

2024 GOALKEEPER GLOVES IN A NEW DESIGN

NEW

We proudly present our 2024 glove collection, crafted to meet every goalkeeper's needs! Regardless of weather conditions, age, or skill level, we have the perfect glove for you. Our gloves combine exceptional grip with long-lasting durability and come in a variety of colors and designs, allowing you to express your personal style on the field.

At the top of the collection is our 88 Pro Grip glove, the ultimate choice of several professional goalkeepers at the highest level. It delivers outstanding performance and is designed to meet the highest demands. As a bonus, it is available in multiple colors.

For the young goalkeeper, we offer a range of gloves, including one with extra finger protection. And, of course, we haven't forgotten the futsal goalkeeper, as we have a glove specially developed for futsal.

Make your mark in the goalkeeper position with our new collection. Created with dedication to quality and design, these gloves are more than just equipment – they are your key to goalkeeper success in 2024 and beyond!

DYNAMIC TAPE

Dynamic tape is a special kind of stretchy tape. It can stretch in different directions.

This tape helps you move better and feel less pain in areas where you are hurt. It's like a friendly helper for your body, making sure you can move comfortably and with less discomfort.

So, if you have a sore muscle or a part that aches, dynamic tape can provide extra support.

Leukotape K with Pain Relief Technique is an elastic tape, which is applied directly onto the skin in the painful area.

Distracting signals provide the pain relief.

Effective shortly after application.

STABILITY TAPE

Stability tape is used to make things stable and in control.

It's used in different situations to make sure everything stays in place and feels secure.

This tape gives support and helps you feel like you're in charge, whether it's holding something together or making your body feel strong and steady.

We always recommend using a pre-wrap under the tape to protect the skin, especially if you are a frequent tape user (shown on page 168)

High-stability tape with reduced elasticity, based on a comfortable textile and adhesive composition that leaves no residue on the skin. Easy to tear. It does not contain latex but provides a high level of resistance to water and sweat. Should be used for securing or stabilizing sprains, twists, or to create better conditions for joints, ligaments, and in areas with high pressure - such as wrists, fingers, ankles, knees, elbows, or shoulders. Can also be used as a final fixation over a bandage. See the leaflet in the box for more information about the product.

This product is a innovative development of the traditional elastic bandage.

The stretch bandage will provide a strong support and does not react with your skin – it's self adhesive and built on a non-woven elastic component with natural rubber latex to ensure optimized conditions.

See the leaflet insert in the box for more information about the product.

STRETCH EXTRA BANDAGE

Style no. 720062 Size 6 cm x 3 m

Price PLN 66

Style no. 720063 Size 8 cm x 3 m

Price PLN 66

This product is the 6th gear of our stretch bandage.

The stretch bandage extra will provide an even stronger support and focuses on a high elastic support.

It's self adhesive and built on a non-woven elastic component with increased levels of natural rubber latex to ensure high compression conditions.

Does not stick to the skin, only to itself.

Sweat and water-resistant.

Can be torn by hand.

See the leaflet insert in the box for more information about the product.

TENSOPLUS

Style no. 720043 Size 8 cm x 3 m

Price PLN 109

High quality elastic self-adhesive bandage.

Does not cling to your skin, just to itself.

Easy to apply and easy to tear across.

Gives the right support compression and stays in place.

Can be used repeatedly.

ELASTIC BANDAGE

Style no. 720092 Size 7,5 cm x 7 m

Price PLN 18,50

Style no. 720093 Size 10 cm x 7 m

Price PLN 23,50

Our elastic bandage is built on a wrap knit with 180% elasticity to create the best possible conditions. It comes with two fastening clips and ability to be washed in the washing machine at 40 degrees. The purpose of the elastic bandage is to optimize relief on sprains, distortions and as well add some compression. After repeated use, the binding loses some of its elasticity and supportive effect. When washed, the binding becomes resilient again. See the leaflet insert in the box for more information about the product.

TENSOPLAST

Outstanding elasticity and adhesive properties.

Allows the skin to breathe during long-term use.

No constrictive edges, does not wrinkle, no marks on the skin.

Good support bandage for fibre, knee and ankle injuries.

RELIEF (SECOND SKIN)

This category is all about protecting against things like hits, friction, scrapes, and other annoyances.

The products are made to keep you safe and prevent problems from happening.

Style no. 720066 Size 7,5 cm x 4,5 m

Price PLN 36,50

This tape is a unique character in our lineup, built to absorb maximum intensity and pressure.

Constructed with a high level of stretch and stability it could support an achilles, shoulder or work as the perfect anchor for a larger tape-up.

It's based on a cotton material that works with A+ in wet conditions.

Due to the strongness of this tape you'll need a scissor.

Often used at the elite level.

See the leaflet insert in the box for more information about the product.

FOAM TAPE

Style no. 720058 Size 5 cm x 3 m

Price PLN 54

6-pack, Style no. 720059 Size 5 cm x 3 m

Price PLN 263

The Profcare Foam Tape is constructed as a protective layer between skin and impact, to reduce wear, rubbing and irritation.

Use it as a second skin in areas that's exposed to increased irritation – could be as a layer beneath your shin guards, on the top of your foot to reduce tackle impacts or when introducing new footwear with intentions to reduce risk of blisters.

Being built of PU foam it's easy to remove and leaves no skin residue.

See the leaflet insert in the box for more information about the product.

PRE WRAP

12-pack, Style no. 720067 Size 7 cm x 20 m

Price PLN 270

If you're a player with a high tape consumption it can be tough for your skin.

In most cases it makes sense to have a layer beneath to prevent irritations.

Our pre-wrap is based on a 100% PU foam that will provide ultimate comfort with an easy removal.

See the leaflet insert in the box for more information about the product.

BALL-PUNKTUR & BALL-STIK

Ball-Stik and Ball-Punktur was developed more than 45 years ago by relaxation therapist Grete Wolfgang. Since then, the massage balls have become iconic and are used in gyms, schools and private homes.

The massage balls soften muscles, stimulate the blood circulation and create lymphatic circulation to reduce swelling.

They are produced in Denmark, and have been since 1972, with phthalate-free plastic. Ball-Punktur is small and handy and can be brought everywhere.

Treating the Tour de France riders, Kristoffer Glavind Kjær has introduced the Ball-Punktur to help riders like three-time World Champion Peter Sagan recover from a day's race by reducing muscle tension, effectively strengthening muscles and increasing blood flow to help them perform at the highest level.

Small and lightweight massage ball suitable for the entire body. The ball's spiked surface supports a special combination of acupuncture, reflexology, and massage – the flow when rolling the ball softens tender and tense muscles while influencing blood circulation. The result includes a reduction in infiltrations and myofascial trigger points. Can be used anywhere and is easy to carry in your bag. The ball can be used in two ways, similar to a foam roller – you can press your body against the ball with appropriate pressure and make rotations, or you can keep the ball still and press firmly on the tender spot. You should feel it, but it shouldn't be painful. After a few minutes, you can start rolling the ball to a new area. It's a good idea to use it after exercising – it prevents muscle soreness and quickly removes waste products. The ball is perfect for extended periods of work or other stressors where muscles become tired and tense.

LEGENDARY SINCE 1947

SELECT Sport was founded in 1947 by Eigil Nielsen, goalkeeper for the Danish national football team, who devoted his life to create the perfect ball. The name of the company was given because of the exclusive leather that was specially selected for the ball production.

By producing many of the ball industry's groundbreaking creations such as the first laceless football, the first ball with 32 panels and balls made of synthetic leather, SELECT naturally became a trendsetter.

Back in 1951, SELECT signed a contract to supply balls for the Danish national football team, and in 1957 SELECT was appointed official supplier by the Danish Handball Federation. These partnerships have continued ever since and are some of the longest in the history of sport. A large number of agreements with both remarkable football and handball federations, clubs and players have since been made.

Today, SELECT is known as the ball specialist. Our footballs, futsal balls and handballs can be found in more than 50 countries, and we are the world's largest supplier of handballs. More than four million different SELECT balls are produced each year through a close cooperation with Anwar Khawaja Industries in Pakistan.

We have been developing balls for 75 years, and the passion for innovative craftsmanship still lives on in our daily work. Football, futsal and handball matches around the world are played with balls built on Eigil Nielsen's original principle of 32 panels, just as most balls produced worldwide are based on SELECT's inventions.

SUSTAINABLE EFFORTS

We know that our actions matter

We are continuously taking sustainable steps in our production, packaging and transportation. We want to reduce the use of plastic in our packaging and are focusing on introducing recycled materials in our products. By using recycled materials, the environmental impact of our products is reduced.

New sustainable efforts at the ball factory

An installation of **404 solar panel modules** on the rooftop at our ball supplier Anwar Khawaja Industries factory in Sialkot, Pakistan has been completed. The installation is expected to reduce **CO₂ emissions by 270 tons annually**. The factory is also ISO 14001 environmental certified and SMETA 4-pillar certified.

Baselayer underwear for sports made with Repreve® Polyester - a yarn made from **recycled plastic bottles**

We saved **300.000 plastic packets annually** by switching our Profcare Support packaging from plastic to a smaller cardboard packaging, thereby **reducing our transport volume**

Our factory is now **only using recycled plastic bags** when producing our footballs and clothes

Our new Monaco range and our Oxford leisure wear contains **recycled polyester**

We have reduced our **use of plastic by 50%** in the packaging of the MONACO, SPAIN, OXFORD and PISA clothing lines

The Planet football, the Planet handball and the futsal Planet, are balls partly made from **recycled plastic bottles** and **natural latex**

Eco ice pack, a CO₂ friendly ice pack without water. By omitting water in the ice packs, we avoid transporting water and will reduce the **CO₂ emissions** compared to our regular ice packs containing water

Our v24 cones are made of **recycled plastic** (high density polyethylene)

Recyclable water bottles in a **bio-based material** processed from sugar canes

To produce our 2024 catalogue, we have chosen a sustainably conscious printing house carrying the **Nordic Swan Ecolabel**, the **ISO 14001 certification** and an **FSC certification**

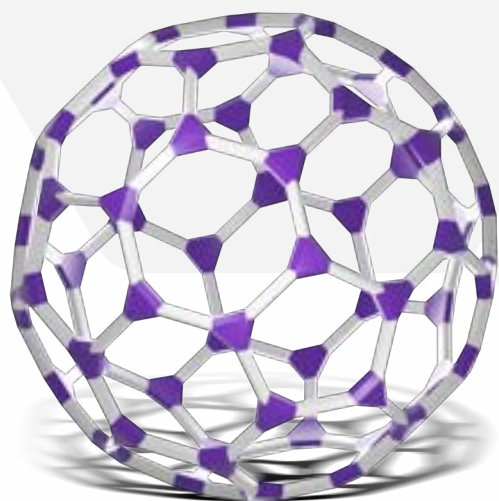

THE ORIGINAL 32 PANEL BALL CONSTRUCTION

Every single football, handball and futsal ball from SELECT is based on the revolution from 1962, where our founder, Egil Nielsen, invented a ball made of 32 panels. The overriding desire was to create the most reliable ball with the most predictable, straight flight and a bounce neither too high nor too low.

It was impossible to make a perfectly round ball with just 18 panels, which was the standard construction of a ball in the past. With the 32 panels – 20 hexagons and 12 pentagons – SELECT succeeded in creating the roundest ball ever seen. Later, a group of American scientists won the Nobel Prize for discovering that the molecules of carbon with a special irradiation organize themselves as a completely round ball – something Egil Nielsen had already discovered and realized in his football with 32 panels, why the reinvention was named “the football molecule”.

A ball with optimum roundness is essential to obtain reliable aerodynamic – a straight flight and a controlled bounce. Our finest football, BRILLANT SUPER TB, has been thoroughly tested in a wind tunnel at the Institute of Health & Sports Science at the University in Tsukuba, Japan. The results show that BRILLANT SUPER has a better aerodynamic than other top balls in the market. The ball's classic construction with 32 panels means that the ball meets resistance at a later point in its trajectory through the air, thus retaining a steady, high speed over a longer period of time. This provides a stable and more predictable flight – highly valued by all football players.

The majority of our balls are still based on Egil Nielsen's original invention of the 32 panel ball construction, as we never compromise on quality, playability or durability.

BLADDERS & VALVES

Beneath the synthetic leather of our top balls, you'll find a Zero-Wing bladder made of natural latex with a built-in balance point opposite the valve hole. The concept has been developed to ensure not only the ball but also the bladder is as round as possible. On the outer side of the bladder, there is a lining of thick, exclusive foam material. The lining helps adjust the softness and enhances the contact between the ball and foot.

Inside our dual-bonded balls, beneath the synthetic leather, you'll find an SR (synthetic rubber) bladder that holds air excellently.

Our futsal balls have a different bladder to ensure the ball has the correct low bounce characteristic of a futsal ball. Hidden behind the elegant surface of the futsal ball is a specially developed butyl bladder with polyester fibers inside. This ensures a highly reliable low-bounce ball compared to a regular football, making it much easier to control and perfect for futsal.

Double-lock
valve

Butyl
valve

The valve in our bladders differs from bladder type to bladder type. In a butyl bladder, the valve is made of butyl, while on latex and SR bladders, we use rubber valves. Our double-lock construction, where the air must pass through two "gates" to escape, exceeds FIFA's requirements for airtightness. In futsal balls, there is a foam lining around the valve on the inside of the bladder, ensuring that the fibers remain in the ball and do not get stuck in the valve, as this would compromise the ball's airtightness.

HAND-STITCHED

With care and precision, the 32 panels are meticulously stitched together by hand, creating outstanding quality and durability. Each ball is the result of 630 double stitches and 60 corner stitches, carefully executed to ensure the ball's structure is solid and robust.

The culmination of this meticulous craftsmanship is a double knot that ensures the ball remains intact and retains its shape through intense use. This thorough approach to production ensures not only a longer lifespan for the ball but also consistent and reliable performance on the field.

THERMO BONDED

TB stands for Thermo Bonding, an advanced method that uses heat and pressure to activate the adhesive bonding the 32 panels together. This means the ball is created without the use of stitches, resulting in a completely smooth surface and a more uniform ball.

This method not only serves to create a seamless construction; TB balls are also designed to effectively resist water absorption. The minimal water absorption helps preserve the ball's original weight, crucial for the gaming experience, especially in wet conditions. Players can trust that the TB ball maintains its quality and performance regardless of the weather conditions on the field.

The TB ball is crafted with attention to detail, delivering an impressive gaming experience that meets the highest standards in ball technology.

ULTRA ZONIC

In 2021, SELECT set new standards in ball technology by introducing the world's first football manufactured using ultrasonic technology. Brilliant Super UZ represents a groundbreaking construction method that is Danish-patented and unique worldwide. This method uses ultrasonic sound waves to weld the ball's 32 panels together.

During the manufacturing process, the ball's panels are held together under pressure while ultrasonic sound waves activate the microfiber molecules in the material. This is achieved by creating friction, resulting in a seamless fusion of the fields. This advanced method not only guarantees exceptional durability but also ensures minimal water absorption. The ultrasonic welding technique is designed to keep the ball's weight stable, even in wet weather conditions.

SELECT's Brilliant Super UZ is a masterpiece of technological innovation and Danish expertise, bringing a new dimension of performance and reliability to the football world. This ball is created for those who appreciate the best in sports equipment and strive for outstanding performances under all conditions.

DUAL BONDED

Our dual-bonded ball production method represents a technologically advanced approach to ball manufacturing that combines the best of both worlds. In this method, the ball's 32 panels are both sewn and glued at the edges. Each part of the ball is carefully assembled using 3 mm edge adhesive and stitches, ensuring a strong and durable construction.

In the heat mold, the ball undergoes a process where the adhesive is activated to conceal the stitches. This technique not only provides a smooth surface but also creates a more aerodynamic and uniform ball. Seam sealing is done manually, emphasizing SELECT's focus on craftsmanship quality and precision.

THE FIRST FIFA QUALITY PRO APPROVED FOOTBALL, WITH A SENSOR INSIDE

SELECT Brillant Super iBall

SELECT and German KINEXON have co-developed the intelligent SELECT Brillant Super iBall – a football with an integrated tracking sensor that will improve the football experience for everyone, as completely new data from football matches will now be available.

SELECT Brillant Super iBall combines SELECT's in-depth knowledge of football with KINEXON's expertise in electronics, tracking and analysis.

SELECT Brillant Super iBall is the first football with an integrated sensor to be FIFA Quality Pro approved, which means it can be used in the top football leagues. Only footballs that have been FIFA Quality Pro approved can be used in international matches organized by FIFA. The new SELECT iBall has passed all of the required tests and is now ready to be played with in every top league around the world.

Advantages of the SELECT iBall

- Collects real-time data on shot speed, successful passes, quality of ball handling, shots per player and team, and much more.
- Can be used by clubs to analyze player performance and the team's performance during matches and training.
- Can engage fans in the stadium and at home with live graphics showing game data.
- Journalists and commentators can receive live data about the match while they are covering it.

Product of the Year

THE WORLD'S FIRST INTELLIGENT HANDBALL ULTIMATE iBall

INTELLIGENT SENSOR FOR AUTOMATED PERFORMANCE MEASUREMENT:

- Shot detection
- Shot speed
- Pass detection
- Pass speed

ULTIMATE IBALL WITH A BUILT-IN CHIP THAT TRACKS AND DISTRIBUTES DATA IN REAL TIME

The ULTIMATE iBall is the world's first intelligent handball, featuring an embedded chip that tracks and distributes data in real-time.

The handball made its debut at the EHF FINAL4 in 2018. This was the first major event in European sports to utilize the new tracking technology, capturing precise ball speed, shot registration, shot position, and more. This data can be used to bring fans and media closer to the game.

In 2024, the ULTIMATE iBall will be used during the EURO tournaments for both men and women.

iBall TECHNOLOGY

Spectators are able to observe the speed of the ball and the distance from goal for every shot in the game.

The shot distribution on court from one team or a specific player will be displayed for broadcasting and digital channels.

The position of every shot entering the goal will be displayed, illustrating scoring strategies. All information is detected automatically and in real-time with interfaces for both broadcast and digital channels.

AN ANATOMICAL WORK OF ART

The top model 88 PRO GRIP consists of 3 mm Pro Tech Latex guaranteeing a perfect grip in all weather conditions. The latex is wrapped from palm to backhand maximising the catching area, and the negative glove cut provides constant latex contact between the hand and the ball. The soft airprene inside provides optimum comfort, increases the glove's flexibility and ensures minimal water absorption when playing in wet weather.

With the aid of an Anatomical Fit System the gloves have been designed with a slight bend according to the natural gripping position of the hand. Thus ensuring comfort, flexibility and movement of the glove aligned with the speed of the fingers.

A wide wrist strap allows a feeling of stability and safety in the wrist. The wrist is asymmetric and has an elastic insert to ensure easy entry into the glove.

Types of cuts

Negative Cut

A popular glove cut choice that reminds of Flat Cut. This style of cut also has gussets between the palm and the backhand. The gussets of the 88 glove are also made of latex giving constant latex contact between the glove and the ball. Negative Cut fits snuggler and the fingers are held in place giving optimal ball contact when catching. This is the most common cut used among professionals.

Flat Cut

Traditional glove cut with a flat palm construction providing a larger area of contact and making the glove more flexible. This style of glove typically fits looser than many other styles with more room for the fingers. Flat Cut is the most popular cut used for finger protection gloves.

Latex technology

Adhesion Plus Latex (93 Elite v23)

Premium latex. The right choice for the professional goalkeeper in terms of grip, softness and durability. Ensures a perfect grip in all kinds of weather and excellent feel with the ball. 3 mm latex with 3 mm foam lining on the back. This latex is used by many goalkeepers at the highest level.

Pro Tech latex (88 Pro Grip v24)

New Premium latex. The right choice for the professional goalkeeper in terms of grip, softness, and durability. Ensures a perfect grip in all weather conditions and excellent feel with the ball. 3 mm latex with 3 mm foam backing. This latex is used by many goalkeepers at the highest level.

Aqua Latex (88 Pro Grip Aqua v23)

Premium latex. Suitable as both match and training gloves. Soft and durable latex that is best suited for rainy weather. This Aqua latex guarantees you a more secure grip on wet days, whether there's heavy rain or it's a damp autumn day. 3 mm latex with 3 mm foam lining.

Quartz Latex (88 Pro Grip red v23)

Premium latex. Ideal for professional goalkeepers. Improved softness ensures a perfect grip in all kinds of weather and excellent ball control. 3 mm latex with 3 mm foam lining on the back. The Quartz latex contains dots in grey pigment. The dots bind the latex molecules together, making the gloves more resistant and ensuring that they last longer. The dots also provide a firmer grip. This latex is used by many goalkeepers at the highest level.

Professional grip latex (90 Flexi Pro v23)

All-round superior latex in black, suitable for both matches and training. In terms of price, this latex is just below the premium gloves, and is therefore also a favourite for amateur players. Guarantees a good grip for goalkeepers in all kinds of weather. 3 mm latex with 3 mm foam lining. This latex is used by many goalkeepers at the highest level.

Giga Grip (77 Super Grip v22)

Very high quality foam for superior gloves. Has a good grip quality, although this does mean that the glove needs to be cleaned more often than other types of latex. Good grip in all weathers and good durability. 3 mm latex with 3 mm foam lining

Dura Grip (55 Extra Force v22 and 34 Protection)

Latex suitable for training. Special latex construction for enhanced durability. The gripping quality is therefore less strong than the superior gloves. 3 mm latex with 3 mm foam lining

New Basic (33 and Futsal Liga)

Latex suitable for training. Special latex construction for enhanced durability. The foam is less soft than the other types of latex we work with, as the focus is on durability. 3 mm latex with 3 mm foam lining

New Softy Latex (04 Protection)

Latex suitable for training. Special latex construction for enhanced durability. The foam is less soft than the other types of latex we work with, as the focus is on durability. 3 mm latex with a 4 mm foam lining compensates for the slightly harder latex

Ultra Pro Latex (88 Kids v23)

Latex suitable for training and matches. Optimised softness and good durability make this foam the ideal foam for children's gloves. 3 mm latex with 3 mm foam lining

Flexion Latex (03 Youth v23)

Latex suitable for training. Special latex construction for enhanced durability. The foam is less soft than the other types of latex we work with, as the focus is on durability. 3 mm latex with a 4 mm foam lining compensates for the slightly harder latex

Glove technology

Anatomic Fit System

Ensures correct fit, as the glove is designed according to hands' natural grip position

The FIFA Quality Programme for Footballs was introduced in 1996 to harmonise and improve the quality of footballs. Focusing on the ball, the very heart of the game, the prestigious FIFA quality labels are only given to balls that have passed rigorous testing.

FIFA Basic is the newest standard focusing on cost efficiency, durability and safeguarding player safety.

INFLATING INSTRUCTIONS

A SELECT ball will last a very long time if these instructions are followed

1. Straighten the ball out as best as possible.

2. Shake the ball so that the bladder is hanging loosely and vertically beneath the valve hole.

3. Allow 1 - 2 drops of SELECT valve oil to drip into the valve hole. Remember to oil the ball regularly so that the valve doesn't dry out.

4. Inflate the ball with a SELECT pump. It is important that the bladder is in the vertical position as shown here. Always remember to use the nipple.

5. Use a SELECT pressure gauge to check if the ball has the recommended pressure (see recommendation on the ball).

6. Clean the ball with a brush and tepid water. Dry the ball with a cloth. Place the ball in a ventilated room with a temperature of 15 - 20°C.
